

G705 DATASHEET

LAB TOOLS > LAB TOOLS

PH METER

Code : G705

• A pH meter in engineering testing laboratories is used to measure the acidity or alkalinity of materials, especially in soil and water testing. It helps assess chemical properties that affect material behavior, ensuring compliance with standards and supporting accurate analysis for construction and environmental decisions.

ORDERING INFORMATION

| ltem | Code |
|------------------------|-----------|
| PH METER (Bench Type) | G705X001U |
| PH INDICATION PAPER | G705X002H |
| PH METER (Pocket Type) | G705X003B |
