## **GEOLOGICAL HAMMER**

Code: G752

A geological hammer in engineering testing laboratories is used for breaking, trimming, and collecting
rock or mineral samples during field investigations. It helps geotechnical engineers examine material
properties and structure, supporting accurate site characterization and analysis.

## **ORDERING INFORMATION**

ltem	Code
DENSITY PICK	G751X001H
GEOLOGICAL HAMMER	G752X001H
