QUARTERING CANVAS

Code: G758

 A quartering canvas in engineering testing laboratories is used for reducing bulk soil or aggregate samples to a representative smaller portion by the quartering method. It provides a clean, flat surface to divide and mix materials accurately, ensuring unbiased sampling for testing.

ORDERING INFORMATION

| ltem | Code |
|-------------------------------------|-----------|
| QUARTERING CANVAS - 1.50 m x 1.50 m | G758X001H |
