

SOIL > CALIFORNIA BEARING RATIO

LABORATORY CBR TESTER, Multi-Speed

Code : T003

- The California Bearing Ratio (CBR) is a penetration test carried out to evaluate the mechanical strength of road subgrades and base-coarse layers.
- Equipped with an TFT controlling unit.
- Has a capacity of 50 kN and automatically performs the test, with an automatic stop after finishing the test and returning to initial position.
- The TFT screen shows the Loading and Penetration in a real time during the test.
- Can be connected to PC via USB cable; allowing transfer of data in realtime to PC via USB to plot load vs. penetration graph
